1893--1913

Department of Pharmacy

This department is adequately equipped for instruction in both *Pharmacy* and *Chemistry*. Eight commodious laboratories are provided, giving ample opportunity for practical work. A fine balance room, well equipped with Sartorius balances, is convenient of access to the analytical laboratory.

In the curriculum the outline of the National Syllabus Committee is followed, thus assuring our graduates a training in conformity with the State Board examinations. In every subject a greater number of hours are offered than are required in the Syllabus.

Three courses are presented: The Graduate in Pharmacy Course, comprising two years of thirty-six weeks each; the Post-Graduate Course, one year of thirty-six weeks; and the Pharmaceutical Chemist Course, two years of forty-eight weeks each. A greater number of hours of actual work is offered in these courses than is usually given in corresponding courses. A special catalog giving full particulars mailed on application.

Our Pharmacy Alumni Association was organized in 1907, and pursuant to suggestions made at a meeting in August, 1908, an Annual was gotten under way. This appeared in 1910 and is now followed by a second issue in January, 1913. It is the hope of many of us that this will appear in future issues and in more and more complete form as the years pass. One thousand copies will be distributed. Will each one kindly acknowledge receipt of this booklet promptly upon its appearance and at the same time give us everything possible in the form of news, addresses, suggestions and criticism.

AN OPEN LETTER.

Begging Dr. Swedenburg's pardon, and without asking his permission, we are printing a "bit" of his private correspondence. This letter might have been written differently if he had anticipated such a move on our part. However, it seemed to typify the feeling of class spirit and loyalty to Alma Mater in such a frank, unaffected, delightful and spontaneous manner that we can not refrain from printing it.

Ashland, Oregon, January 9, 1911.

Mr. G. D. Timmons,
Valparaiso, Ind.

My Dear Friend Dick:

Your card and the pharmacy annual have just arrived and really it was as great a treat as if I could have stepped in and shaken hands with you, old boy. Pardon my familiar way of addressing you, for, although it has been thirteen or fourteen years since we were classmates together, it only seems as if it were yesterday, and the scenes of those days of toil in the little old analytical laboratory in the old College building, come back as vividly before me as if we were going through with our tests of the unknown elements, like in those jolly good days. The great effort of that time was to see how many test tubes we could swipe from one another, while today, it's the bread and butter question with us, which then did not bother us as much as passing our exams.

I wonder what has become of old Mackenbach? He was a prince of a fellow and the only man that could smuggle past the guards with the U. S. Dispensatory. And do you recollect the time when _____ received the nice little compliment from Weems for his examination, when he told him he "did not understand how it was that some people had such splendidly written examinations when they had such poor quizzes?" Gee, but those were great old times, and it is too bad we cannot be boys again to repeat the trick.

I am sure that if I were to pass through those days again I would not worry one-half as much as I did then about getting through; but perhaps it's better thus, for I must say that I got the best discipline for the work in after life, at good old Valparaiso. I always think of

it with a benediction, for to it I attribute the beginning of the success that I have made in my professional career. And I am sure I am only one of many who voice the same sentiment. I have met many Valpo graduates, and when we meet them, wherever that may be, even though there are years between our graduations, we seem drawn together as if we were of one blood and one family. And even though I have passed through two other institutions of learning, since I graduated at old Valpo, yet I have the kindest and warmest of feelings for my old Alma Mater and the Class of 1897.

As you know I came West the last time I called upon you, and located here at Ashland, Oregon, and professionally and financially I have done very well, indeed; in fact better than the average physician and surgeon.

Last year we completed a \$20,000.00 Hospital here in our city, of which I am chief surgeon, and, in fact, we are making this a sort of a surgical center for the southern part of the state. You can form some idea of the amount of work, when I tell you I have performed over one thousand capital operations in the four years I have been in Ashland. And the best of all is that out of that one thousand but nine were lost, which makes it less than one per cent; a record which few of the greatest surgeons in the states today can boast of. And the work is increasing until I am making arrangements with my brother to come and join me, and it is our hope and ambition to build up a sort of a miniature surgical center like the Mayo Bros. of Rochester, Minn., have done in the past twenty years.

It is my intention, if I can get away this summer, to make a flying trip to Europe, and if I do I shall certainly stop off and shake hands with you and the rest of the professors I know in dear old Valpo.

I have sent quite a number of students, besides my brothers, to that institution and if my calculations do not miscarry, I expect to send you one or two for next year's work.

Enclosed you will find a check, \$2.00, for the little annual, which I trust will come in handy and I hope will act as a stimulus to keep your annual coming to us as a visitor every year. I trust that the boys and the girls will all respond and all reply in accounting for themselves and their work so that we may know more and more about one another from year to year.

In closing will say that I do not know much more in reference to the members of the class, than what you have already recorded. Will say, however, that Dr. Andrist is at Owatonna, Minn., and is still single and in a nascent state and looking for his affinity. How-

ever, I have done better than he in this respect, for I have a better half and two little girls.

My brother Charles who graduated in the Class of 1902 is located with me here at Ashland, and for the time being has forsaken pharmacy, which he has followed for the past thirteen or fourteen years, and is interested in orchards and orchard lands. He has a happy family of three, two girls and a boy. Brother A. W., of the Class of 1904, who graduated from the Medical Department of Valparaiso is located in the far north at Thief River Falls, Minn., is also married and has done better than I, for he has one boy and one girl.

I am afraid this letter is getting too long and will take up too much of your time, for I know you are a busy man in bringing order from chaos and pounding chemistry and chemical formulas into the novices.

Trusting that you and your family are all well, and that all is well with the school, I am with the season's greetings,

Very sincerely and fraternally your old Classmate,

F. G. SWEDENBURG.

—Phillips Brooks

Dear Alumni, Greeting:—

Truly this work of gathering news and presenting it to you is a "labor of love." A glance at the financial report will demonstrate this. It is such letters as the above that infuse new energy into us and encourage us to put out just one more issue of the Annual. Do not evolve a letter of commendation under high pressure out of a sense of duty, but if you really find yourself feeling like Dr. Sweedenburg, and a dozen others have felt, why, "Speak up, Ike, 'spress yo'self."

The plan of this annual is much different from the previous one, the entire edition of which is long since exhausted. News of the faculty was given in the former issue and would not be materially changed in this one. One or two minor changes in the teaching force is all there would be new to tell you.

Considerable space was given to relating the growth of the town and of the University. They are still growing, but, again this would be largely a repetition of what was formerly said.

Another reason for omitting mention of school news and school affairs is the fact that an excellent description of the University itself, and of the Pharmacy Department as it is now in operation, was given in the catalog sent to every one of you in July. We hope you put this on file and have read it carefully.

If you gave it any attention you found it full of information, and of real news to you. If you didn't get yours, let us send you another. Cuts of the buildings and rooms of interest to you were put in the catalog. Even a ball game and Sager's Lake were put in as reminders. Hence these were left out of this Annual.

Notice that each class roll is omitted as such, but appears in an extended form. The names of all members are given in alphabetical order and a bit of news of each, even though it is only to tell you that their present address is unknown or that they will not respond to letters delivered to them. In all cases envelopes bearing return address are used and we can not help wondering where a letter goes and who gets it if it isn't returned. In many instances this failure to reply to our letters is a matter of procrastination. You do not wilfully neglect writing. You are heartily glad to hear from classmates and friends and are equally desirous of having them hear from you. You will write, but not now. Next week will do. There is no hurry. And that letter never gets written. May we not have it different next issue? Read over this annual. See how many of your classmates are located for you. Can't you help us find just one more? Is the news too brief about some one? Add to it, won't you? Do you think that we do not want to be annoyed by your letter full of news? Well, you are mistaken. Often we do not answer unless you ask about something directly. I am sure you understand the reason why. Keep on writing and let us reply through catalog and annual.

Very sincerely,

G. D. TIMMONS.

PRESIDENT W. L. MOSS

AN OPEN LETTER FROM OUR PRESIDENT.

To the Members of the Pharmacy Alumni Association of Valparaiso University:

“Dick” Timmons has made life miserable for me during the past few months, asking me to write a letter to the graduates, to be published in the Annual.

There is one thing above all others that I desire in this communication, and that is to have such powers of letter writing, as to be able to impress you with the idea that all of you owe to your Alma Mater at least an occasional visit; and if not a visit, to keep in touch with the Alumni Association. There are probably some who have attended school at “Valpo” who feel that because they did not pay a small sized fortune for tuition, board, etc., that it is not worthy of their support. This is just where you are mistaken. Valparaiso University, in the humble opinion of the writer,

is doing the greatest work along educational lines of any university or college in the United States.

If you do not feel as above stated, then why, oh why, is it necessary for Prof. Timmons or the writer to have to write two thousand letters to one thousand graduates, and have one hundred reply? You ought to be ashamed of this.

Of course, receiving the large salary of President of the Alumni Association that I do, and having the liberal expense account that the members so kindly allow, it is no trouble, on the contrary, it is indeed a considerable pleasure to notify you of the time of our annual meetings, etc.

In preparing this Annual, I am sure Mr. Timmons does not object to working six nights in the week, or to mailing same, and keeping up with the addresses of the graduates, on account of the fact that the Association voted to pay him a magnificent salary. He may deny these facts; but do not believe him, they are true (?)

While this has been intended for a curtain lecture to some extent, let me call the attention of the graduates, who live near Valparaiso, to the fact that at the last meeting, in May past, that of the total number present, a large majority of those came a long distance. There are, within seventy-five miles of Valparaiso, at least one hundred and fifty graduates, and probably ten of those attended the last meeting.

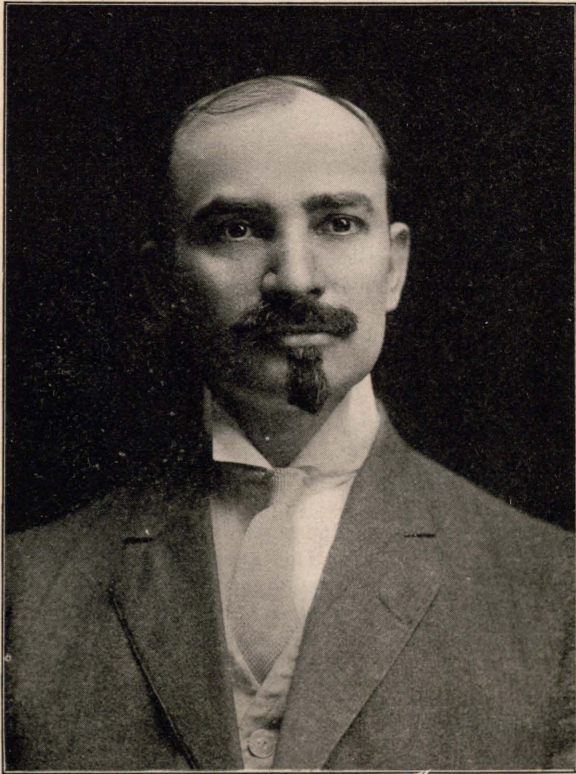

If you do not like what I say, you have only one way of helping yourself, and that is to attend the next annual meeting and defeat me for the presidency. Until you do that, you may expect to receive these and other love letters at regular intervals.

Be loyal to Valparaiso University. It deserves it.

Very sincerely,

WHITE LANE MOSS,

President.

DR. F. W. MITCHELL, 1900

THE VALUE OF AN ALUMNI ASSOCIATION.

The value of an Alumni Association to a school is most apparent and easily understood, and it is of no less value to the individual, be he student or graduate.

Man is essentially a social being, and as such, owes most that he is, or expects to be, to others. We do not come to school, pay our own way, and carve out our own career, to live in selfish contentment. Not a man leaves the school-door, but has taken more than he brought.

**ARCHIVES
VALPARAISO UNIVERSITY**

A school is a living, pulsing, thing, with a personality that is greater than its founders, and as human as life itself. Through it all is an ever-pervading spirit that fixes its standing in life. It is moral—or not, intellectual, or not, practical—or not, humanly kind—or not, just as the sum total of effort expended in developing these attributes.

Men in school calmly endure the vicissitudes of the present because their eyes are fixed on the future. Then the future arriving, they find the little bright spots standing out in memory's pages. Referring back to school days and he recalls only the good that was in instructor and fellow student.

The great substance that leavens life's embitterments is understanding. Everyone wishes above all else to be merely understood, which means appreciation. Here then is the solid foundation of an Alumni Association. We meet in full confidence that each has met, and solved, the same problems. A feeling of kinship is at once established, and a new interest is found that links a pleasant past to a helpful present. This spirit though materially invisible is potential and paternal. We are brothers of like experience, and our Alumni Association is a family circle. Here we foregather as children to our Alma Mater.

The social sense is a refinement of human nature. Just as a college recognizes social obligations to its students, so will the students reciprocate. Thus a common interest is created, maintained, and waxes strong. Verily a successful, enthusiastic graduate is worth more to a college than a full page advertisement.

College spirit is founded on pride, but it is a pride that endures. This spirit is not best expressed in loud conduct of shallow minds, but woos us with a tender touch as we meet to renew our faith. A faith that is institutional as well as individual.

Just as pride of country is patriotic, pride of family commendable, pride of school is complimentary and consistent.

Here at the college shrine we meet to recall the halcyon days of youth, when the seeds of learning were being planted, and our very character taking on shape and solidarity. Here in retrospection we live our better lives again, and in the comrade spirit of our Alumni Association we see our dreams come true.

Fellow Alumnus, let us meet often to honor our past, enjoy the present, and hope for our future.

Faternally,

F. W. MITCHELL.

OUR GIRLS.

This year Mrs. Emma Gary Wallace wrote a series of articles for the Pharmaceutical Era on "Women in Pharmacy." She called upon us for information concerning our lady graduates. Of a total of fifty-nine, I could give more or less information of fifty-four. Many of these ladies are engaged in Pharmacy, or in medicine and are succeeding in their chosen professions. Quite a goodly number have married and in this event have very naturally turned their attention to the home. In several instances, however, their husbands are either druggists, or doctors, so they still maintain an interest in their pharmaceutical training.

Mrs. Wallace chose from the entire list sent her a dozen of our girls who seemed to her to typify success in pharmacy, and at the same time to represent each class as nearly as possible. Some of these folks responded promptly and I am sure it made every old graduate glad to see something of the success of one of the girls of Valpo University appearing in a leading drug journal. Others, in spite of the combined and repeated urging of both Mrs. Wallace and myself, refused to give any news for publication. Courtesy forbids the mention of names, but probably you can pick them out.

Personally, I have taken some pride in being able to furnish so complete a history of our lady graduates for the twenty years past. I would certainly appreciate hearing from every one of the delinquents,—or even hearing of them.

A NEW PLAN.

An examination of this Annual will impress upon you the magnitude of correspondence connected therewith. Here is a suggestion. Will you not take it upon yourself to act as secretary for your own class? Gather news? Trace the lost ones? Make life miserable for the negligent? In short get a complete history of **your** class?

Personally, I tried this with the class of 1897. In every instance where a graduate was lost to us I wrote the postmaster urging him to help me find the lost one. In every instance, save one, I received a courteous and usually a helpful reply. Often they could only suggest a new address, but that kept me on the trail. I am sorry to have to record that in a few cases, when, after much time and trouble, a

classmate was located, he would not reply to letters. Does it seem strange, or not?

Dr. G. H. Mundt, of the class of '03, took the secretaryship of his class and succeeded in locating eleven of his mates whom I had not found at all. In other cases he corrected addresses and added to news already collected. His class should appreciate the voluntary services of this very busy professional man. His example is worthy of emulation. Will you not act upon it now? If you can not do the work, who will you suggest of your classmates as the ideal one to get this very much desired news? In the next Annual what class can have a complete set of news notes? Not one member missing. Every single one located. It is worth the effort.

Let me hear from you. The suggestion, I know, is a good one. Will you not act upon it?

THE AMERICAN PHARMACEUTICAL ASSOCIATION.

This well known and long established society should number among its members at least all graduates of our school who are actively interested in Pharmacy. The fee of \$5.00 per year entitles the member to the Journal of the Association, a most excellent pharmaceutical magazine, together with a bound volume of the proceedings. While these are in themselves well worth the fee, there must be added to these all the many advantages accruing to the member of any powerful organization.

This year the association met in Denver and the members were treated royally by the people of that city. In Denver and the immediate vicinity there are a number of our graduates, not one of whom, as far as we are able to learn, belongs to the association. This is not said to cast any reflections upon them, but only to point a moral. Several of the colleges of the country were represented by a gathering of their alumni. An informal program and a banquet were thoroughly enjoyed by each little group. Valparaiso did not have enough representatives to warrant an announcement.

Next year the association meets at Nashville, Tenn. This is more centrally located for us than Denver, and very many of our graduates should be there. May we not have an enthusiastic meeting of Valpo Pharmics August 25-30 at Nashville? Let's gather around a few tables and once more sing, "Hail! Hail! the gang's all here," with such old time vim that even though they're not all there, folks will be disposed to think they are. Is Valparaiso to be deservedly

represented at Nashville in 1913? All in favor say "aye." The "ayes" have it. Write me about it and remember the Time, the Place and the School.

Each live member naturally wants to propose as many new members as possible each year. Therefore we would like to have your name. By referring to the last page of the Pharmacy Catalog you may see that both Professor Linton and myself are actively interested in the increase of A. Ph. A. membership. Since each application must be made through someone already a member, who can better fill out your blank and certify to your good character than we here in Valparaiso? Send us your name.

PHARMACEUTICAL JOURNALS.

Through the kindness of the publishers the Pharmacy Department has been placed on the subscription lists and we now receive regularly the following publications:

- American Druggist, New York City.
- Apothecary, Boston, Mass.
- Bulletin of Pharmacy, Detroit, Mich.
- Druggist's Circular, New York City.
- Journal A. Ph. A., Columbus, Ohio.
- Merck's Report, New York City.
- Meyer Brothers' Druggist, St. Louis, Mo.
- Midland Druggist, Columbus, Ohio.
- N. A. R. D. Notes, Chicago, Ill.
- National Druggist, St. Louis, Mo.
- Northwestern Druggist, St. Paul, Minn.
- Pharmaceutical Era, New York City.
- Practical Druggist, New York City.
- Southern Pharmaceutical Journal, Dallas, Texas.
- Spatula, Boston, Mass.
- Western Druggist, Chicago, Ill.

These journals are left in the Pharmacy Building and all students enrolled in Pharmacy have access to them. In this way they become familiar with present day problems, both theoretical and practical. They have an opportunity to see the profession of Pharmacy from various angles and in many lights. Also the student becomes familiar with all the publications pertaining to his profession, and is thus a better judge which one to continue reading after leaving school.

What Journals do you take? You can make no mistake in choosing from the above list. This is not an advertisement. This is reciprocity.

FINANCIAL REPORT.

First a brief history, and explanation. This Alumni Association was organized in 1907 and Miss Retta Pocock was appointed Secretary and Treasurer. The work done by her was enormous. She advanced the money for an extensive correspondence, receiving a 50 cent contribution here and there, and paying her postage and stationery, stenographers' and printers' bills out of this. At a meeting in August 1908, she made a complete report accounting for every penny. This report was read in open meeting and accepted by motion of Dr. Nesbit of '99. Unfortunately it is not now available for printing.

Since then all remittances have come to me, most of them directly. These remittances began after the issue of the Annual in 1910. Embodied in this report is a list of names of all contributors with the amounts sent in. In case any one contributed and has not received due credit, he is urged to communicate with me and the error will be rectified. In case you did not contribute please give your "entire and undivided attention" to the remainder of this report.

To make clear to some just what becomes of their money let me call your attention to the fact that there are almost eleven hundred of you. At times I have mailed notices to every one, purposely mailing to old addresses in hopes the letter would be forwarded instead of returned. In many instances I have located some one whom we had not as yet found. But, it takes money. Eleven hundred letters, enclosing return addressed postals begging you for news of yourself costs almost \$50.00. To mail the first Annual cost 3 cents each for postage alone. To acknowledge the receipt of your reply 2 cents more, and stationery. There were 650 Annuals sent out. Many were never even acknowledged. Many acknowledged and no remittance made. The mere cost of mailing these, and acknowledging the returns reached near \$30.00. And the work— But who counts this? We enjoy it. However, dear folks, do not think we are getting rich off of you, that this is a J. Rufus Wallingford scheme. Do not contribute a cent unless you feel that you get value received. If you want this Annual continued from year to year we will know it by your responses. And do not pay excepting for the current number already in your possession. Payment in advance puts the writer under future obligations which he may not be able to meet and should not be asked to assume. The date of the next issue will depend largely upon the fate of this one. However, in every communication sent in please give us every scrap of news possible. It is all preserved and made use of later.

To this deficit must be added the expense of this present issue and the cost of mailing it and acknowledging the receipts.

Also there should be considered that the present President, White L. Moss, took upon himself the issuance of Alumni meeting notices last spring, expending at least \$50.00 in so doing. It is no more than common fairness that he be reimbursed. His time he gave freely, as do many of us, but he should not be allowed to be actual money out.

No children, although plenty poor enough to have a dozen." Perfected a percolation process described in Merck's Report, May '05. When he arrived in California he had to pass a stiff state examination and found it "almost too easy. Chemistry, in which at school I was considered far from a wizard, was the simplest branch of all." To take an examination almost without notice after being out of school for seven years and passing it satisfactorily "speaks well for one's training or brain. As my mental caliber is about No. 3 French, it must be the school." Sends the address of McNivin of '99. Later sends us the address of a prospective student, as an excuse,—the real object of the letter is to announce the recent arrival of a real live boy.

McCarty, Mary C., Good Thunder, Minn. Now Mrs. Mary McDonald, 243 Sidney St., St. Paul, Minn. We finally succeeded in locating her through the kind aid of the postmaster at her home town. After leaving Valpo she worked in drug stores for a while and taught school some. "Eight years ago married that red headed Irishman, Edward McDonald, who attended school the same time I did." The nice things she says about him are omitted. They have three Mc's coming on, Joseph, Ruth and Paul. The oldest just starting to school. She says that much as she enjoyed mixing medicines, housekeeping is better.

Two years were spent in Fort Smith, Ark., then followed extensive travel, including a year's visit to the old country. Invented an invalid's adjustable bed, now manufactured by the Wallace Adjustable Bed Co. of St. Louis. This invention, worked out while an interne in Cook County Hospital, has added to the doctor's bank account as well as to his reputation. Married Miss Vida Still in '07, and has a three year old boy. Some unkindly say that he is largely in the motor car manufacturing business, but he has lately turned his entire attention to politics.

Mosely, Edgar B., Guffie, Ky. Now in Argenta, Ark. In partnership with Bert Butler of '98. Together they own three-fourths of the Hall Drug Company and all of a large soda parlor annex. Came to Valpo a married man, and reports an eight-year-old daughter belonging to "Bess" and himself. Worked at the College Pharmacy for a time immediately after graduation, then went to Little Rock. Then in business for himself, only to sell out and go to California. Soon returned to "Old Arkansas" and has stuck there since. Says, "Give Old Nick my regards." This casts no reflection on us and is not an insinuation that we make "Auld Clottie" our associate. It is only an expression of good fellowship toward the clown of the class. Has anyone forgotten Nixon?

Movius, Alfred H., Lidgerwood, N. Dak. We learn from his classmate, Clemens, that he is a prosperous physician in Jamestown, N. D. He never writes.

Mundt, J. Herman, Mason City, Ill. Now at Chelan, Wash. Spent several years as manager of the College Pharmacy in Valpo. Married Miss Rose Long, a Pharmic of '05, in September of that year. In '07 they went to Chelan and both passed the Washington State Board. They enjoy an excellent drug trade, besides having other interests to look after. Wrote us a short letter in May, '11, promising to write a long one later, and—just like many of the rest of you—never does it.

Osborn, Ernest O., Fenton, La. Now in Knoxville, Ia. Proprietor of Osborn's Pharmacy at Knoxville. Ten years ago the first of May he began working in the store he now owns. He also has a fine home all paid for. Reports that he is "up and comin'" and hopes to receive the Annual. Extends us an invitation to come out and go fishing and camping, and adds:

May the Alumni in Valpo be one of good cheer,
 May its joys and its pleasures extend far and near;
 May the spirit engendered last through the year;
 May the memories left with you be ever held dear.

Perry, Otis G., Willow, Ill. Now in Dubuque, Iowa. We find through the State Board report that he is registered in Iowa. Persels, Burdette R., Osceola, Iowa. Mail returned.

Pitt, J. Otto, New Albany, Ind. Now at Tremonton, Utah, where he is practicing medicine, having graduated from a Louisville college in '03. Says that it is "just bully" to be getting out an Annual of briefs of the Pharmacy classes. That is the spirit that keeps up the loyalty of the old school. Is prospering where he is, but thinks of changing to some other state soon. Gave us no news.

Preston, Della Mae, Petersburg, Ind. Practiced pharmacy at Chicago a year and a half. Was married to Dr. Gray in '02 and lived at Peterson, Ind., where the doctor enjoyed a very extensive practice until his death in '07. Mailed us an imposing envelope which we thought could contain nothing else than the announcement of his marriage, but it was only the news that he has opened a suite in the Metropolitan Building with a practice limited to surgery. Any one of us who has followed his career knows that he is perfectly capable of taking care of such a practice. In the spring of '11 he returned from a year's study in Europe. At latest reports he was Hospital Commissioner for his city. Says he will be pleased to meet any of the Alumni coming to St. Louis.

Dirstine, Isaac C., Lind, Wash. Is married and the owner of a drug stock in Connel, Wash. He refused to be discouraged when his store and contents burned, but rebuilt and is trying again. We suppose that he is still of the same height, but his increased weight would slightly change his appearance, for he claims to weigh now 187 pounds of sixteen ounces each. News came to us that long ago "Ike" was elected Justice of the Peace and that it was well worth the price of admission to see him marry his first couple. Boys of '01, just imagine "Ike" in a ministerial role. A late letter from his brother Pearl of '05 says he is with John of '97 in drug business in Lind.

Dixon, James Edmond, Hartsville, Ill. Now at Sims, Ill. Graduated in Medicine and has been practicing since.

Pocock, Retta, Argos, Ind. Now in Oklahoma City, Okla., c/o Westfall's. After graduation she took a position with a wholesale and retail drug firm that did much manufacturing and thereby acquired a very practical knowledge of the business. Although she was getting \$100 per month she was earning it at the expense of her

health, so she resigned to take a position with the above firm where at last account she was manager of their prescription department at \$125.00. Not many years after graduation she became interested in news of her classmates and later out of this grew the present Annual. The first systematic correspondence tending to gather news was carried on by her, and it was only when the actual labor connected with this work became greater than she could care for that she relinquished it. Much credit is due to her from our student body.

Stonehart, George Vincent, Brazil, Ind. Now at Rosedale, Ind. Entered the P. & S. the year after graduation, and before the year was out received orders from his doctor "to go to the mountains." Instead he went down where they were building a new coal mine, fixed himself a hut, and lived outdoors for a year. His health was returning in good shape when his father died, thus throwing extra responsibility upon him. He fought it through, however, and now tips the scales at 200 pounds. Moss, White Lane, Pineville, Ky. Now President of the Alumni Association and a most enthusiastic worker in the interest of our

graduates and of our school. He gave much of his time and money last year in an effort to get all graduates in closer touch and to make the Alumni meeting a success. Many of us will meet him in Nashville next August at the A. Ph. A. meeting. Married in June '05 and has not as yet lived to regret it. From graduation to '03 he managed a pharmacy in his home town, then to Fort Smith, Ark., for a year, when he returned to his native state, taking a place as head prescription clerk with T. P. Taylor Co., of Louisville, the largest drug company of the South. After a year in their employ he returned to Pineville and organized the White Moss Drug Co., which proved to be a very prosperous firm. In '07 he closed out his drug business and became superintendent of a coal mining company in which he and his father held a controlling interest. The rest of the story may best be told by presenting a clipping from the Appalachian Trade Journal: "In looking for the most progressive and enterprising citizen of Pineville, it was very natural that W. L. Moss was selected as president of the Commercial Club. A better selection could not have been made and we say this without any discredit to the other public spirited citizens of Pineville. The basis of Pineville's prosperity is coal. Mr. Moss is a coal man, a successful coal operator, in fact for a man of twenty-eight years of age, his prominence in the Kentucky-Tennessee field is a high compliment to his ability as a business man, a promoter (in the best sense of the word) and as an actual operator. Until recently he was secretary and general manager of the Straight Creek Coal Mining Company, which was bought by the Continental Coal Corporation, a company with a capital of \$3,000,000, which was recently organized and acquired eighteen mines on Straight Creek and Four Mile Creek, three hundred coke ovens and eleven miles of railroad, and retail yards. Mr. Moss was one of the organizers of the Continental and in the permanent organization became general superintendent of mines, with headquarters at Wallsend, Ky. Mr. Moss is also a director in the Wilhoit Consolidated Coal Company, vice-president of the Moss Coal Mining Company and president of the Straight Creek Coal Company. He is one of the original members of the Southern Appalachian Coal Operators Association and his active interest from the first has helped largely to its success. He can always be counted upon to support any good enterprise or movement that will benefit the coal industry, his city, county and section. He is a natural born booster, and his business ability coupled with the winning qualities of energy and enthusiasm, makes him as popular as he is successful."

This is the first class taking the full two year's course of seventy two weeks. From now on every graduate must have spent at least six terms or quarters with an interim of one quarter between junior and senior years. The attendance, both juniors and seniors, makes a larger class (now, Nov. 1912) than we have ever had in the history of the school, therefore, do not judge of the total attendance by the graduating rolls.

Adelman, James Chester, Central, Pa. Returned to Valpo and entered the Medical work, clerking in the book store between times. Failed to return for his second year, and we have lost track of him.

Allen, Fred, Lima, W. Va. Now in Horton, W. Va. Has been engaged in drug work ever since leaving school. Was manager of the Whitmer Drug Co., at Whitmer, W. Va. He has passed the State Board, receiving credits which will allow him full registration as soon as time credit will permit them to issue his certificate. Later he was transferred from Whitmer to Horton, in the employ of the same drug company. Says he is on the top of the Allegheny Mts., where they have quite a summer resort and that their drugs command a price comparable with their altitude. Sends us news of some of his mates, as well as a West Virginia boy for Pharmacy.

Baughman, Daniel Sparks, Everett, Pa. Completed the Medical course in the C. C. M. S. in 1911 and won an internship in Cook County Hospital where he is now to be found.

Bolstad, Herbert Clarence, Chicago, Ill. Completed the Classical course in August, 1909. Entered the N. W. Medical College in Chicago and is on the road to the making of a successful physician. Visited Valpo some time ago.

Cantrall, Thomas Leroy, Athens, Ill. Soon after graduation he purchased a drug store in his home town, where he is now doing a prosperous business. Married soon after and says very confidentially that "while there is nothing like it, starting a fire in a cranky cook-stove on a cold morning is one drawback." He is thinking of taking up veterinary work in Chicago and taking his wife along for the Pharmacy course which he thinks will be a splendid combination. Of course he better send her here to take Pharmacy. His picture appeared in the Pharmaceutical Era a little over two years ago as winner of the prize offered for the best answers to their series of questions in their quiz course. Is registered in Indiana and Illinois.

Chapman, Clarence Frederick, Yale, Ill. Now at 1201 Grand St., Des Moines, Iowa. Has been in the employ of the Saverude Drug Co. since graduation and is doing well with them. Sends us announcement of his wedding to Miss Ula Schneider, October 18, 1911. At home in Des Moines. In response to a letter he met us at the train on our way to Denver. He is the same jolly Chapman. Just passed the Iowa board for full registration.

Ducrest, Alphonse, Valparaiso, Ind. Has remained in Valparaiso ever since graduation, taking some work occasionally in any subject in which he might be interested. He also graduated from the job of ringing the bell and is now one of the regular assistants in the general office where he can be found on duty at any time. He tells me O'Brian's latest address frequently, but some way I fail to land him. Guess I shall have to send Ducrest after him.

Kimlel, John Edward, Shelbyville, Ill. Now in Cincinnati, O., 246 Helen St. Worked at the Weis Drug Store in Hammond almost since graduation. Took time enough off to complete a Ph. C. course in the N. W., where he proved a splendid student. Concluded to put his chemistry into continuous practice, so severed his connection with the drug store and took a position in the laboratory of the Illinois Steel Co., but later went with the Wm. S. Merrell Co., which position he likes the best of anything tried so far.

Lunn, Abraham E., New York, N. Y. Completed the Medical course in 1911 and is now serving an internship in Rhodes Avenue Hospital, in Chicago.

McCoy, J. Kenneth, Ashley, W. Va. Now at Kingwood, W. Va. Worked for a time in Hammond and later went to Kingwood, where he is now engaged in the management of the Strickler Drug Store, and is doing well. Sends us a student or two. Later news says he is married now.

Was employed in the Summer's Drug Store a couple of years and later transferred his services to the Weis Drug Firm, both of Hammond, where he remained until June, '12. He left Hammond to take charge of the Central Drug Store at the Harbor. Successfully passed the examination for registration in 1911. Visits Valpo occasionally.

Sorensen, Soren, Valparaiso, Ind. Dropped completely out of our knowledge. We have never been able to learn anything concerning his whereabouts.

Stanfield, Delno N., Annapolis, Ill. Now in Crawfordsville, Ind. Clerked in the above town for over a year, then returned to Valpo for post-graduate work the year of 1910-11 and returned to take the management of the same store he started in, feeling amply repaid for his year spent in school. Won the prize offered by the Pharmaceutical Era, (Spring of '11) for best set of answers to one of their monthly quizzes. His picture and T. L. Cantrall's appeared in succeeding issues as winners. It was a coincidence that they were room-mates, back in 1908-9. Registered in Indiana.

Strand, Martin E., Elk Rapids, Mich. Obtained a position with Noyes Bros. and Cuttler of St. Paul, but mail addressed to him there is returned and we have no further knowledge of him.

Woodruff, Herbert H., Bone Gap, Ill. Immediately after graduation took charge of a drug store in Crawfordsville, Ind., where he remained until the fall of '10, at which time he and his father purchased a drug store in Danville, Ind., where he is now doing a prosperous business. The store is one of the oldest in the country and is in the hands of one of the best druggists in the state.

CLASS OF 1910.

To the members of the classes of 1910, 1911, and 1912; Greeting:

Wherever you may be, however you may be prospering, whether you are clerk or proprietor, single or married, here's hoping that you are a credit to the profession and to old Valpo. If you are just a little better as a pharmacist than any other pharmacist in your town or vicinity, then you have raised the standard of pharmacy in your community by just that much, and you have performed a very great service to the people of that community. Do not think of pharmacy altogether as a vocation that you are engaged in because you think it is going to pay you money (I sincerely hope that it will do so), but think of it as a calling that will enable you to become an exceedingly useful member of society. People need medicine sometimes, statements of Christian Scientists and osteopaths to the contrary notwithstanding, and when they need medicine, they need the very best that care

and skill can provide. It is for you to dispense that kind of medicine; you can do it. I know you can. That you can do so, is your excuse for calling yourselves pharmacists, is the reason for the profession. Remember that any vocation or calling that does not justify itself, that does not prove a reason for its existence, cannot long continue to exist.

Of course, I know that things have not been just as you expected them to be. You have had to do a lot of things that you felt were somewhat beneath your dignity. You have probably thought a few times that if Linton had given you a little less of the theoretical, and had told you more of pharmacy as you have found it, he would have served you better. I will venture to say that since leaving school you have had abundant coaching in the practical side, ranging all the way from how to clean a cuspidor to how to demonstrate a safety razor, but perhaps have received but meagre instruction in real pharmacy. After all then, what you may have absorbed in Room I will not come amiss.

By the way, Room I has been much improved since you fellows of 1910 saw it last, as indeed have many other things in our equipment. We are not through yet, however; when we have things good enough to be entirely satisfactory, we expect to be ready to stop teaching.

The hopeful class of 1913 is at present spending several enjoyable hours daily in Room I, of which you have such fond recollections.

Again wishing you an abundant measure of prosperity, and hoping to meet a goodly number of you at Nashville next August, I am,
Sincerely yours,

A. W. LINTON.

Luck to you, Zwalsk.

CLASS OF 1911.

The details of an arrangement to have a special write-up of your class was well known to you all. In December of 1911 the material for the other portion of an annual was fairly well in hand and I expected to issue this in January, 1912. Then I began to communicate with Messrs. Williams, Blayney, and Harper. Williams had collected from one dozen out of the class and paid me the \$24.00. Since then four others have sent in \$2.00 each. This money is not entered in the financial report and is due and returnable to you on notification to me, or will be turned into the general fund, in whole or in part, as you may direct, and will be so accounted for in the next issue. Please make yourselves thoroughly satisfied concerning this. I would return the money now, but do not know the accurate address of each one, and to send to part of the contributors is hardly fair to the remaining ones. Please attend to this at once. Your money is here on call from you.

Mr. Williams reported that he could not get any reply from the committee who was to furnish the material for publication. Mr. Blayney reported to me that he could furnish all that was expected of him on short notice, but didn't. However, he squared himself by being present commencement time and facing the music in May, 1912. Mr. Harper never replied to my letters. I wrote him repeatedly and

have never had a letter returned undelivered. In the next issue we will give Harper a chance to do some tall explaining. I have endeavored to get all the news possible of your class and submit what I have as a meager substitute for what I had hoped you would have.

Was owner of a drug store before coming to take a course in Pharmacy, and after graduation, immediately returned to his home and actively took charge of his drug business. Reports that he is teaching a class of young ladies in a Sunday School, which makes us suspect that he is trying to work some kind of a graft in his community.

Arroyo, Armando, Yauco, Porto Rico. Sailed for Porto Rico in June.

Bell, Jerry S., DePauw, Ind. Went out for the summer vacation to work at Emington, Ill., but expects to return and take up his Medicine in December at the opening of the winter term.

Immediately after the close of the year's work he got a good position in Plymouth, Ind. Passed the West Virginia board with flying colors at the last examination and took to himself a wife on this same home trip. We learn that he is now in Rochester, Ind.

Casey, Charles Brooks, Boxley, Ark. Now in Berryville, Ark., "engaged in pursuits of happiness for the soul, mind and body, namely hunting, fishing, farming, flunkey to a threshing machine, and to wind up with, attended an old time Baptist revival." Is now clerking in the above town and "enjoying the work immensely."

Davila, J. Marquez, Lares, Porto Rico. Now in Baltimore, Md., 711 N. Calvert St. Sailed for Porto Rico in June, and July 11th we had a letter from him headed San Juan and telling us he was employed in the Biological Laboratory of Sanitation at \$150 per month and not enough work to hurt him. Later returned to the States for a medical course in the above city.

Steel Car Co., where he finds work that just suits him. To reach him address Freeport, Box 8.

Klinglesmith, Ora, Cecilian, Ky. Now at Warner, S. D. Was disappointed in his Colorado position on account of the lack of experience, the prospective employer not notifying him properly of this demand. Later he obtained a position in a wholesale house in Sioux Falls, S. D., where he worked until September, when he took a position as teacher at Warner, S. D.

Laatsch, C. E. F., Lockport, N. Y. Now at Albion, Neb., c/o Quality Drug Store. Took a position in Indiana Harbor, but found that the town was too small for him and moved to Chicago. UNCLASSIFIED.

Seabloom, J. L., Red Oak, Iowa. Was a student in Valpo in 1900 and took much of the pharmacy work. Whether he graduated or not we do not know, but distinctly remember him as a very earnest student, so hunted up his address and sent him an Annual and received \$2 and a letter saying that he had practiced medicine in Red Oak, Iowa, for the past six years and hopes to visit Valpo before long. Graduated in medicine in the spring of '04 from the P. & S. of St. Louis. Was elected assistant professor of mental and nervous diseases but had to decline on account of ill health, "other than mental," however. Passed the Iowa Board and began practicing at Red Oak, where he still enjoys a respectable practice. He is trying to keep up some of the chemical formulae so that he can readily respond if asked for the composition of malachite or the graphic formulae 606. I wrote to him and asked him for definite information concerning his school days or graduation, but received no reply.

Brown, Alexander B., Corona, Cal. After graduating in Pharmacy, took a course in Dentistry and is now practicing in Corona, Cal. As his name does not appear on any class roll, I wrote to him at the address given above asking him for further information regarding his class, but failed to hear from him.

An unknown reports on the Alumni card that present address is Nahcotta, Wash., the card itself being mailed at Wolverine, Mich., and unsigned. Letters addressed to postmasters of both of the above named places failed to elicit any information concerning the writer. If anyone can give us further information, please do so.

Somebody having graduated in Medicine reports that they are practicing Medicine in Hannibal, Missouri, since and registered in Iowa, but fails to sign their name.

ADVERTISEMENTS.

Fellow Graduates:

Last year we had very few advertisements. We wrote to nearly one hundred firms this year and you see the result. Just a few were kind enough to respond. Do we owe these people anything? Why not specify P. & W., M. C. W., N. Y. Q., etc., on your next order. Do you need a first class pharmaceutical or medical book? Remember Saunders. Or a quiz? Get acquainted with the Medical Book Co. These people have been kind in assisting us financially in the issue of this annual. It is only fair that they should have some return for their patronage.

Do you remember Prof. Roessler's definition of reciprocity, "You tickle me and I'll tickle you?" Well, just consider yourselves tickled.

Antiphlogistine

TRADE MARK

¶ Made by the same firm which originated it over twenty years ago, Antiphlogistine has the same formula today as when it originally made its reputation with the physicians. If it is smoother and more elegant, it is because of improved machinery and because the ingredients are the best and of the most expensive grade obtainable.

¶ But, notwithstanding the fact that the ingredients entering into its composition have greatly advanced in price, in the case of some as much as 50 per cent., our price has not followed the increased cost, but also remains the same.

¶ Your jobber will supply you as heretofore at regular prices, subject to the quantity discount for 6 dozen small or its equivalent.
