CALENDAR 1876-77.

FALL TERM Commences August 29th, 1876, and continues Eleven Weeks.

WINTER TERM Commences November 14th, and continues Eleven Weeks.

SPRING TERM Commences January 30th, 1877, and continues Eleven Weeks.

SUMMER TERM Commences April 17th, and continues Eleven Weeks.

The Annual Commencement occurs on Thursday, June 28th at the close of the School Year.

Advantages.

The Northern-Indiana Normal School though differing from other Normal Schools and Colleges in management, arrangement of studies, and methods of teaching, yet occupies one of the highest positions among our educational institutions.

We have learned by observation that there are thousands of people with strong minds passing through life without any education whatever, from the following reasons :

I. They are unable to meet the enormous expenses common to so many of our schools, and should they be ABLE to do this they are unwilling to expend their money for that which is not practical.

II. The time required to secure even an ordinary education, is too long in most of our institutions of learning.

III. Students are compelled to study many branches that are not practical and perhaps are distasteful to them, and thus their progress is retarded.

With a design of meeting all these difficulties the Normal at Valparaiso was established. That it is fulfilling its design is manifest from the fact that it is now the LARGEST AND MOST POPULAR NORMAL SCHOOL IN THE LAND. Here the expenses are within the reach of all. Experience has taught us that the extravagant bills students are required to pay are wholly unnecessary, and that a thorough, practical education can be secured at one-third the expense and in much less time than is usually required.

The curriculum embraces only those studies that are *practical*; hence all who come here have the privilege of selecting their own studies, and no one is held back on account of those less advanced or less interested.

The school is open to all. Rich and poor alike will receive a hearty welcome, and everything that can be done, will be done in order that their stay may be both pleasant and profitable.

WE DO NOT ASK ANY ONE TO TAKE OUR WORD ALONE AS EVIDENCE OF WHAT WE ARE DOING, BUT WILL SAY THAT THIS CATALOGUE CONTAINS THE NAMES OF OUR STUDENTS, TO ANY ONE OF WHOM REFERENCE MAY BE MADE; AND FURTHER, SHOULD THINGS NOT BE AS REPRESENTED, OR SHOULD ANY STUDENT BE DISSATISFIED WITH THE WORK IN ANY OF THE DEPARTMENTS, MONEY, IN ALL CASES WILL BE REFUNDED.

The School must stand upon its own merits.

The Institution has been in operation but three years, yet in this brief period a great work has been accomplished. The enrollment has increased from 61 to 1,320 per term. The College Buildings have been repaired, and two Boarding Halls, one 32x130 feet, the other 37x95 feet, each three stories high, erected; a Book-store and Reading Room established; new and valuable additions made to the apparatus of the several Departments; in short, no labor nor expense has been spared in preparing everything necessary for enhancing the interests of the School.

NORMAL COURSE OF STUDY.

PREPARATORY YEAR.

TERMS.	MATHEMATICS.	SCIENCES.	LANGUAGES.	COMPOSITION.	DRILLS.	TEACHING.
1 Term, 11 Weeks.	<i>Arithmetic.</i>	<i>Geography and Map Drawing.</i>	<i>English Grammar.</i>	<i>Letter Writing.</i>	<i>Penmanship and Debating.</i>	<i>Training and Practice.</i>
2 Term, 11 Weeks.	<i>Arithmetic.</i>	<i>Geography and Map Drawing.</i>	<i>English Grammar & Analysis.</i>	<i>Composition.</i>	<i>Elocution and Debating.</i>	<i>Training and Practice.</i>
3 Term, 11 Weeks.	<i>Algebra or Book-Keeping.</i>	<i>Physiology.</i>	<i>Rhetoric.</i>	<i>Composition & History U. S.</i>	<i>Orthography and Debating.</i>	<i>Training and Practice.</i>
4 Term, 11 Weeks.	<i>Algebra or Book-Keeping.</i>	<i>Experiment Class in Nat. Phi. & Chem.</i>	<i>Latin.</i>	<i>History of U. S.</i>	<i>Vocal Music and Debating.</i>	<i>Training and Practice.</i>

SCIENTIFIC YEAR.

TERMS.	MATHEMATICS.	SCIENCES.	LANGUAGES.	COMPOSITION.	FORENSICS.	LITERATURE.
1 Term, 11 Weeks.	<i>Algebra & Geometry.</i>	<i>Botany & Geology.</i>	<i>Introductory Lessons and Cæsar.</i>	<i>Rhetoric.</i>	<i>Debating.</i>	<i>English Authors.</i>
2 Term, 11 Weeks.	<i>Trigonometry & Analytical Geometry.</i>	<i>Physiology.</i>	<i>Cæsar and Ovid.</i>	<i>Essays and English History.</i>	<i>Debating.</i>	<i>American Authors.</i>
3 Term, 11 Weeks.	<i>Calculus</i> { <i>Integral.</i> <i>Differ'n'l.</i>	<i>Natural Philosophy with Experiments.</i>	<i>Virgil.</i>	<i>Essays and English History.</i>	<i>Debating.</i>	<i>U. S. Government.</i>
4 Term, 11 Weeks.	<i>Astronomy, Surveying and Engineering.</i>	<i>Chemistry with Experiments.</i>	<i>Cicero.</i>	<i>Essays and English History.</i>	<i>Debating.</i>	<i>Evidences of Christianity.</i>

CLASSIC YEAR.

TERMS.	PSYCHOLOGY, &c.	LATIN.	GREEK.	COMPOSITION.	HISTORY.	FORENSICS.
1 Term, 11 Weeks.	<i>Mental Philos., Emp. and Rational.</i>	<i>Horace, Antiquities.</i>	<i>Preliminary Lessons and Xenophon.</i>	<i>Lectures by the Student.</i>	<i>Ancient.</i>	<i>Debating.</i>
2 Term, 11 Weeks.	<i>Moral Philosophy and Political Economy.</i>	<i>Livy, Mythology.</i>	<i>Xenophon & Homer.</i>	<i>Lectures by the Student.</i>	<i>Ancient.</i>	<i>Debating.</i>
3 Term, 11 Weeks.	<i>Logic & Æsthetics.</i>	<i>Tacitus, Literature.</i>	<i>Æschylus.</i>	<i>Lectures by the Student.</i>	<i>History of Civilization.</i>	<i>Debating.</i>
4 Term, 11 Weeks.	<i>Criticism.</i>	<i>Latin Composition.</i>	<i>Plato.</i>	<i>Lectures by the Student.</i>	<i>History of Civilization.</i>	<i>Debating.</i>

Course of Study.

The regular course of study is presented on the sixth page. Students desiring to take the full course will follow the order indicated. Though the studies are thus arranged, yet students who cannot take the full course will have the privilege of selecting from the curriculum such studies as they may desire. New classes will be formed at the beginning of every term, in order that all may be accommodated.

No person need fear that there will not be suitable classes to enter at any time during the school year, however backward, or, indeed, however well advanced he or she may be.

Students *thoroughly* versed in the common branches can complete the Classic Course in two years of forty-four weeks each, or the Scientific Course in one year of forty-four weeks.

Some may suppose that our course is too extensive for the time. We simply invite such to give us a trial, and be convinced that we can verify *every statement made in our Catalogue*.

Departments.

I. PREPARATORY.—This department is designed to receive students of any age, and at any stage of advancement. Parents too frequently suppose it to be unnecessary to send their children "away from home to school" until they are prepared to study the higher branches. This, however, is one of the popular errors of the age. The early education of the child is of the most importance, therefore should receive the most careful attention. Many children, from improper training while young, contract an aversion for books; thus their life in a measure is thrown away.

The child should have correct training in the Common Branches, as these form the foundation for that which is to follow. We advise nearly every one who enters the school to review the elementary studies. Many scholars are too much inclined to pass unnoticed this most important part of a true education. New classes are formed in each of the branches of this department at the beginning of every term. Parents need entertain no fears that their children will not be accommodated, as the only preparation necessary before entering the School is, that the student be able to read in common school books. We begin with primary classes.

☞ Especial attention will be given each term to Vocal Music, Elocution, and Penmanship, without extra charge.

Teachers' Department.

The constant demand for trained teachers, requires that we make a specialty of this department. The most prominent objections, urged by teachers, against the course pursued in most of our Schools and Academies, are—1st. They are held back in their classes on account of those less advanced and less interested in their studies, 2nd. They have not the privilege of selecting their own studies. 3d. The recitations are too short.

In the Normal School all these objections are met. The recitations are fifty-two minutes in length, thus giving ample time for the thorough discussion of every subject. Our large attendance enables us to have a much greater variety of classes than can possibly be had where the number is small, hence students can select their own studies and advance as rapidly as they may desire.

We hope, in this part of our work, to make such arrangements as will enable those teachers who have but a short respite from their schools to spend their time and means to the best possible advantage. Beginning, advanced, and review classes will be formed in each of the Common Branches at the beginning of every term: one for those who may desire to begin the work, one for those who wish to take an advanced course, and one for those who may wish to review any of the subjects and become familiar with the Normal Methods of teaching them.

Those engaged in the teacher's work frequently find difficult questions to answer, difficult problems to solve, difficult pupils to manage. This is the place to prepare for all these emergencies. Here you will be in a class composed entirely of teachers: persons representing not only this State but almost every State in the Union. This affords many advantages. The different plans are presented, carefully discussed, and the very best selected. A thorough drill will be given in the methods of teaching the various branches. What shall I teach? How shall I teach? How shall I make my school room attractive? and a host of similar questions, will be satisfactorily answered.

☞ On leaving the school, students will be aided, as far as possible, in securing situations.

Business Department.

The aim in this Department is to give to the student a clear, practical knowledge of the Science of Accounts, and all Commercial transactions.

STUDIES.—Book-keeping, both Single and Double-Entry, Commission and Shipping, Partnership, Banking, Steamboating and Railroading, Commercial Correspondence, Commercial Arithmetic, Penmanship, English Grammar, Commercial Law and Debating.

It is a well-known fact among all business men that there is too much of the *theoretical* and not enough of the *practical* taught in our Commercial Colleges. Many, nay, I may say *all* who take a mere theoretical course, are totally unfit to enter any business house as accountants. Why do we so often hear the remark by business men—"give me a man who has never taken a Commercial Course?" Simply because our Schools are not practical. It is not the aim of the Commercial Department of the NORMAL to give an idea of book-keeping only, and thus prepare the student for the Counting House alone; but to give such an education as will be of benefit to him in every day life. We make the student thoroughly acquainted with all instruments of writing, such as writing business letters, notes, articles of agreement, mortgages, filling out deeds, etc., etc. We have money which he uses; he buys and sells, makes his own day book and journal entries. In banking we have regular offices, where he performs the actual work of the cashier, receiving teller, paying teller, etc. Thus he learns how to *work* and not to *theorize* only. Besides enjoying all the privileges of a room which is completely furnished, the student has the advantage of low tuition. While at most Commercial Colleges this is from \$40.00 to \$50.00, in the Normal it is but \$8.00; the course more extensive and practical, and the student has the privilege of studying any of the branches found in our Curriculum; thus he can prepare for teaching or review any subject while he is prosecuting his Commercial studies.

ENGINEERING DEPARTMENT.

In this department the very best instruments will be used. The student will have *actual practice* in the field, so that on completing the work, which can be done in a short time, he will be fully prepared to enter upon the duties of County Surveyor or Civil Engineer. We know of no other place where equal opportunities are offered for gaining a practical knowledge of these subjects in so short a time. The *manner* in which a subject is presented, not the *time*, makes perfect.

COLLEGIATE DEPARTMENT.

This is designed for such as may desire to take a full and complete course of training. Those who complete the Classic Course will be able, not only to teach in any of our Schools and Academies, but will be prepared to enter upon any profession in life.

DIPLOMAS FROM THE NORMAL.

Honor is due to the worthy, therefore any person, regardless of sex, who may complete any one of the four courses, viz.: Classic, Scientific, Business or Teachers', will receive a beautiful and appropriate Diploma as a testimonial of the ability acquired in any of the courses of training, and not to show the number of books studied.

Expenses.

TUITION—\$8.00 PER TERM, PAYABLE IN ADVANCE. NO EXTRA CHARGE FOR GERMAN AND DRAWING.

The great demand, during the past year, for the study of these important branches, which have hitherto been considered extra, has compelled us to place them with the regular studies. In order to do this and supply competent instructors we have found it necessary to fix the tuition at \$8.00 per term. See page 27.

BOARDING.—The Boarding Department, though ably managed, has not had the conveniencies necessary to make it entirely satisfactory. During the past term the Principal has taken it under his own supervision. The dining hall has been much enlarged; the tables neatly furnished; the price of cooking reduced from 50 to 25 cents per week; so that now board, which under the new management has given entire satisfaction, and furnished room, (if paid in advance,) range from \$2.00 to \$2.40 per week, never exceeding \$2.40 per week; if paid by the week, \$2.00 to \$2.50 per week. In case the student is compelled to leave before the close of the term his money is refunded. The club plan has been discontinued, and a regular Boarding Hall established. Three years observation have convinced us that by this means better board can be provided, and at lower rates. The Principal and Teachers room in the same buildings and dine at the same tables with the students, thus making it one common family. It can now safely be said that the boarding arrangements at the Normal are not equaled by those of any other School. The buildings are all new, neatly furnished and well cared for. So satisfactory is everything that out of the large number in attendance not more than 30 are boarding in private families, though many of the students come from homes of luxury. The question is frequently asked—how are the rooms furnished? In reply we give a brief statement of the number of articles for one room:

Stove, Bedstead, Bed and Bedding, consisting of Mattress, Bolster, Pillows, two Sheets, one heavy Comfort, (it might be well for students to bring an extra blanket with them,) Table, Chairs, Wash-Bowl and Pitcher, Mirror, Curtains, Bucket, Wood-Box, &c. Carpet will be furnished at very little additional expense. We furnish everything except Towels, Lights and Fuel.

The rooms are well taken care of each day by a person employed especially for this purpose, thus everything is made as cheerful and home-like as possible, and at very little expense to the student.

Owing to the rapid growth of the school we have had some difficulty in securing for all such accommodations as we desired, yet there has been no dissatisfaction, because we have made the expenses to correspond. For the future there need be no fears with regard to this. Already arrangements have been made for the erection of several commodious buildings. These, with those now in use, will furnish ample room for all who may desire to come, so that no one need fear that he will not be accommodated at the advertised rates. Should we fail in this the TRAVELING EXPENSES OF THE STUDENT TO AND FROM THE SCHOOL WILL BE PAID AT OUR EXPENSE.

BOOKS.—Arrangements are now made so that the student can use the books he may have in his possession, thus saving a great expense.

Preparatory Department.

The Catalogue is issued quarterly and semi-quarterly, so that only a partial list of the names will be found in each issue.

Outline of the Work for One Term.

In order to answer the many letters of inquiry with reference to the classes sustained each term, we will give a brief outline of the work for one Session.

ARITHMETIC.—There will be THREE GRADES OF CLASSES in Practical Arithmetic, one BEGINNING the work, designed for those who have never studied the subject, and those who wish to review the first principles; and another for those who desire to complete the work. The third class will be a REVIEW CLASS and will commence with compound numbers. These grades will be so sectioned as to have not more than 60 students in each class. Careful attention will be given to MENTAL ARITHMETIC. The plan as used here, in the investigation of these subjects, differs from that of *any other school*. It has been most *carefully and successfully tested* in many of our common and high schools, which confirms our belief that it is *just what is needed*. The student is not only thoroughly drilled in the subject as presented in the text-book, but also in numerous PRACTICAL EXAMPLES found in every day life. When he has COMPLETED THE WORK he will be MASTER of the subject and can use his knowledge INDEPENDENT OF BOOKS.

ALGEBRA.—There will be FOUR classes in Algebra, one beginning the Elementary work, and one commencing with "radicals" and completing the work. The third class will begin with the Higher Algebra, and the fourth commence with "radicals" and complete the work.

GEOMETRY, TRIGONOMETRY AND ASTRONOMY.—There will be one class in GEOMETRY, one in TRIGONOMETRY, and one in ASTRONOMY.

SURVEYING AND ENGINEERING.—In SURVEYING AND ENGINEERING there will be classes in which the very BEST instruments will be used.

COMMERCIAL DEPARTMENT.—All of the classes in the COMMERCIAL DEPARTMENT will be in operation. The student who gives his *entire time* to this work, can, in one term, prepare himself for *any department of business*. Everything is made as practical as possible. A room is furnished with Banks, Offices, etc.; the student uses the "College Money" and performs all of the duties found in actual business life. By these means *much time is saved*, and the learner made more thorough in his work. NO EXTRA CHARGE IN THIS DEPARTMENT. See page 8.

GRAMMAR.—There will be two CLASSES in GRAMMAR, one for those who desire to begin the work, also for those who have given but little attention to the subject; the other will be an ADVANCED OR REVIEW CLASS, designed for those who are somewhat familiar with the subject. In this class all of the different Parts of Speech will be taken into consideration, but especial attention given to the DIFFICULT POINTS, such as *Relative Pronouns, Infinitives, Participles, and Active and Passive Voices of Verbs*. In connection with this class, ANALYSIS will be so clearly taught as to render those who have never studied the subject *thoroughly acquainted* with its principles, and enable them to *analyze any sentence* that may be presented.

RHETORIC.—There will be two classes in RHETORIC, one beginning and one advanced. These are designed for those who are familiar with the subject of Grammar, and desire to make a *practical application* of it. In connection with these classes there will be classes in Composition and Letter Writing, which will be conducted in such a manner as to make the "much hated composition writing" a pleasure.

LATIN AND GREEK.—Beginning and advanced classes will be sustained in both Latin and Greek.

GEOGRAPHY AND MAP DRAWING.—**GEOGRAPHY AND MAP DRAWING** will be taught after the most approved methods. There is no other School with which we are acquainted, in which these subjects are presented in so **ATTRACTIVE AND INSTRUCTIVE** a manner as at the Normal. It is one of the most pleasing and instructive classes in school. It is not simply the learning of questions and reciting by rote, but the acquiring of *useful knowledge* so arranged as to be retained by the student. This is a profitable class for all, especially Teachers, as it affords them many means for interesting their pupils when *everything else fails*.

PHYSIOLOGY.—There will be two classes in **PHYSIOLOGY** in which every topic connected with the subject will be thoroughly discussed and fully explained by the use of good apparatus.

U. S. HISTORY.—History of the United States will be taught in such a way as will give the student a definite plan whereby he may retain those points which are usually considered so difficult to remember.

BOTANY, GEOLOGY AND ZOOLOGY.—There will be classes in Botany, Geology and Zoology. These are useful subjects for the teacher. There are no means by which the little child can be so interested as in the analysis of flowers, or a description of the earth, its formation, its myriads of inhabitants, &c.

PHILOSOPHY AND CHEMISTRY.—One class will be sustained in Philosophy, and one in Chemistry; in each of which the student will have free access to all the apparatus necessary for the thorough elucidation of any subject; he will perform many experiments for which he will manufacture his own apparatus, and thus be enabled to repeat these experiments in his classes, or make use of them in whatever profession he may engage.

ELOCUTION.—The subject of Elocution, or Reading, will receive the most careful attention, as we consider this an important part of a true education.

PENMANSHIP.—Penmanship will be taught in a clear and practical manner. The drill in this class alone is well worth the entire tuition fee. No extra charge.

VOCAL MUSIC.—Vocal Music will be taught in such a manner as to give a comprehensive idea of the rudiments of Music.

DEBATING.—Debating and Literary Societies will be so arranged as to give all an opportunity of participating. These are so managed as to induce many who have failed to see beauty in exercises of this character to become first in the exercises.

TRAINING OF TEACHERS.—Besides all of these classes there will be a Teachers' Training Class, in which all of the common branches will be reviewed and the very best plans given for presenting them to pupils. The fact that the teachers who have been trained in this school have given universal satisfaction, indicates that the plans and methods adopted here are just what are needed in common and high schools.

SCHOOL GOVERNMENT.—Much attention will be given to School Government. Methods will be presented whereby many of the trials and difficulties of the teacher may be obviated.

With a few modifications in the higher branches, this outline will answer for any term.

CHOICE OF STUDIES.

This is a feature of much importance to those who desire to prepare for a particular profession, or have but a short time in which to attend School. While at the Normal there is a regular course of study—and we believe when it is at all practicable the student will do well to take it, yet there are thousands who cannot do this and to compel them to enter certain classes and advance just so rapidly is unjust in the extreme. Many will not attend school from this reason. At this institution there are classes of every grade and in every branch desired by the student, so that no one need fear that he will not be accommodated at any time with studies to suit his wants, or that he will be held back in his classes.

German and Drawing.

The great demand during the past year for the study of these important branches has compelled us to place them with the regular studies, in order that all might have equal advantages. Almost every application for a teacher is attended with this remark—"one who can teach German preferred," or, "one who can teach Drawing preferred." In the business world it is almost an impossibility to secure a position without a knowledge of the German language. GERMAN.—As instructor in this branch we have secured the services of Mr. G. BLOCH, a native German, whose reputation as a teacher needs no commendations. He is not only thoroughly educated in the German language, but the English as well, and is thus enabled to unite them so as to give the student a means of speaking as well as reading. Especial attention is given to conversation. The time required for becoming familiar with this branch depends much on the aptness of the student. In one term such a knowledge can be acquired as will enable him to pursue the study alone, while in three terms he will become a ready reader or speaker.

DRAWING.—The method of teaching Drawing, as used here, differs from that of any other School. It is so easy, plain, and comprehensive, that in one term the student can grasp the whole subject. The little child can take it up as readily as the grown person, and now that it is so much demanded in schools of every grade, no teacher can afford to be without a knowledge of it.

The knowledge gained in one term by the study of these two branches is well worth our entire tuition fee. NOW NO EXTRA CHARGE.

EXTRA BRANCHES.

INSTRUMENTAL MUSIC.—We take pleasure in stating that we have secured the services of Miss Lillie Chamberlin, of Republic, Ohio, who will give lessons on either Piano or Organ at \$10.00 per term; also, Voice Culture. Having received a private education in both instrumental and vocal music, under the instruction of one of the most thorough teachers in the State, and having had much experience as a teacher, she will, we are confident, give entire satisfaction to all who may desire a complete musical education. Use of instruments free.

TELEGRAPHY.—Those desiring to take a course in this valuable art will have the privilege of receiving instruction from G. A. Dodge, operator on the Pittsburgh, Ft. Wayne & Chicago Railroad. This will be a rare opportunity for becoming fully acquainted with the true science of Telegraphy. Tuition, \$6.00 per term. Every student who has taken a thorough course at this institution has secured a good position.

PHONOGRAPHY—This department was established for the purpose of placing this valuable art within reach of the masses, from whom it has long been kept by the enormous rates charged for tuition in other institutions. The course pursued by the teacher is thorough and practical. One term is sufficient to complete the corresponding style, which is used so extensively in all branches of business. Those wishing to become reporters would do well to spend two terms on the subject.

General Observations.

Many years of careful study have been given to the organization, classification, and furnishing of every department of the Normal. The constant aim has been to establish a School supplied with every convenience necessary for the acquirement of a first-class education, and yet place the expenses within the reach of all. Nothing that could be done has been left undone, in order that our purpose might be accomplished. Every want has been supplied. We are confident that *now* the Normal offers to those desiring an education, advantages superior to those of any other similar institution, as will be learned by the careful reading of this catalogue, or by visiting the school itself.

FEATURES OF THE SCHOOL.

- I. The Institution is *self-governing* in its character.
- II. A true education is accomplished more fully by co-education of the sexes.
- III. Education is not merely the acquisition of knowledge, but the accumulation of *physical, mental and moral power*.
- IV. It is a school where an education is made accessible to all. Rich and poor alike may receive a thorough, practical education. *Work* is the standard, not *wealth*.
- V. The institution has no endowment, therefore must depend upon its own merits for its patronage and support; thus causing its teachers to exert all their energies in order that entire satisfaction may be given.
- VI. The teachers are all thoroughly trained and prepared for work.
- VII. In a three years' course in this Institution the student will receive an education equivalent to a six years' course in many of our Colleges; thus making it the *cheapest and most profitable* School in the West.
- VIII. The moral and religious interests of each student are carefully guarded, yet no Sectarian principles are inculcated.

LITERARY SOCIETIES.

Regular debating societies are sustained during the entire year. Besides these, new societies are formed at the opening of each term; thus affording an opportunity for students to become proficient in this much neglected art. Composition exercises and Letter Writing are so conducted as will enable the student to write and properly punctuate letters of all kinds, and prepare with ease an essay on any subject that may be assigned.

LIBRARY.

Students have free access to a good Library, containing Encyclopedias, Histories, Choice Literature, &c. A large addition to this has been made during the past year. It is earnestly desired that each one who attends the School will make good use of these books and, if possible, take a thorough course in reading. It will aid him more than anything else in his life-work. Too much attention cannot be given to the careful reading of good books.

APPARATUS AND CABINET.

The School is in possession of a full supply of Anatomical and Geographical Maps and Charts, Philosophical, Astronomical and Chemical Apparatus, and a fine Geological Cabinet. Though circumstances over which we have had no control, caused some delay in the furnishing of this department, yet we are now prepared to offer as fine advantages, and as good apparatus, as can possibly be had at any of our higher institutions of learning.

A Natural and an Artificial skeleton are used by the class in the study of Physiology, thus affording superior advantages for the investigation of this science. Students will have a thorough drill in the use of apparatus in illustrating every subject.

BOOKS.

Arrangements are now made so that the student can use the books he may bring with him, thus saving a great expense. Should any desire to purchase books they can by conferring with the Principal, procure them at greatly reduced rates.

WHY VALPARAISO WAS SELECTED AS A SUITABLE PLACE AT WHICH TO LOCATE THE SCHOOL.

The city being located on the highest point of land in Indiana, and within the limit of the lake breezes, is freed from all miasmatic poisons, therefore is the most healthful place in the North-West.

CARE FOR STUDENTS IN CASE OF SICKNESS.

In case a student becomes sick, while attending the School, he has the personal care, not only of the Principal, but also that of two nurses, a lady and a gentleman. These are always in readiness, and, when necessary, will give their entire time to the patient. Every want will be supplied. In case of protracted sickness, the parents or guardians will, each day at our expense, receive word either by letter or telegram; so that no fears need be entertained that the student will be uncared for or that his sickness will be kept a secret. No charge is made for the attention given by the nurses; thus in many instances a doctor's bill is avoided.

WHAT STUDENTS SHALL DO ON ARRIVING AT VALPARAISO.

On reaching the city come directly to the Principal's office, which will be found in the School building. Here all necessary information will be given with reference to studies, classes, rooms, boarding, &c., &c.

CAPACITY OF SCHOOL BUILDINGS.

The College building is a large and commodious one. Besides containing two Society Halls, and an Audience Room that will seat one thousand persons, it has an abundance of large and comfortable recitation rooms. During the past year these have been supplied with first-class furniture, good black-boards, good means of ventilation, and every convenience necessary to the health and comfort of the student.

TEACHERS EMPLOYED.

During the past year fourteen teachers have been employed, each having charge of his or her especial department. Much care has been taken in the selection of instructors, and such general satisfaction has been given, that although additions to the faculty have been made, yet none of the older teachers have left the ranks. Observation has taught us that a continual change of teachers is detrimental to a school. Experience adds much to proficiency.

TIME SCHOOL IS IN SESSION.

The School year consists of four terms of eleven weeks each. School is in session from 6:30 A. M. until 7:30 P. M. Students come to the School building to recite only. The studying is done in their own rooms, hence they are not confined in the school room the entire day but during *their* hours of recitation only. Those who prefer to room at some distance from the College building are provided with a study room, which is cared for at our expense. By availing themselves of this they will save their fuel.

All mail is carried to and from the Post-office free of charge.

The School is open to visitors at all times, and a most cordial invitation is extended to parents, teachers, and all interested in the cause of education to visit the school and see how it is managed.

Advantages of a Large Attendance.

The School has stood the test of criticism, and now the only objection urged against it is that "the attendance is so large that each student cannot receive proper attention." This comes from those unacquainted with the management of the school. It is true that were the same number of teachers employed; the same help to care for students retained; the same amount of room used, when the attendance is large as when it is small, then the objection would be valid. But where the teaching force is increased in proportion to the number of students in attendance; reliable help procured for each department; and an abundance of room supplied, it is plain to be seen that a School of one thousand students can be as easily managed as one of five hundred, with as good results, and *we* believe *better*. Experience has proven that a large attendance, instead of being detrimental to a school, affords many advantages that *cannot be enjoyed where the attendance is small*. A few of these advantages are here given:

- I. It gives a means of making the expenses much less than they could possibly be made in any other way.
 - II. It enables the officers of the School to supply more teachers, and those better qualified. Instructors of ability are always anxious to secure positions in prosperous institutions.
 - III. It gives a greater range of studies, hence students can be accommodated with just such branches as they may desire.
 - IV. It affords facilities for securing better positions for students.
 - V. It places the school on a firmer financial basis, furnishes money with which to supply apparatus, books, &c. In fact a large attendance gives strength and vigor, encouragement and cheer, and thus causes general growth and prosperity.
- Besides all of these, it is a sure indication that the work is satisfactory. The growth of a school is an almost certain index of what it is accomplishing. When students return term after term, and, in almost every case bring some of their friends with them, it proves conclusively that satisfaction is being given.

Summary of the Advantages of the Normal.

- I. Students have the privilege of selecting their own studies, and can advance as rapidly as they may desire.
- II. Beginning, advanced and review classes are formed in the common and higher branches each term.
- III. A Teachers' class is formed every term, in which all of the common branches are reviewed, and the different methods of presenting them carefully tested; thus making it a valuable School for those who wish to study the science of teaching.
- IV. There is no vacation between terms; hence students can enter at any time. The studies are so arranged that no one need fear that he will not find classes adapted to his wants.
- V. All the advantages of a regular Commercial College are enjoyed, without extra charge.
- VI. Drawing is now classed with the regular studies.
- VII. A thorough course in Music at one-half the usual expense.
- VIII. A full course in Telegraphy for \$6.00.
- IX. Phonography at \$3.50 per term.
- X. German taught after the most approved method without additional expense.
- XI. Thorough drills in Penmanship, Vocal Music and Debating given gratuitously.
- XII. Books can be purchased here at as low rates as from the Publishers themselves.
- XIII. The buildings are fine and location unsurpassed.
- XIV. It is the *cheapest* and most *profitable* School in the land for all who desire a *thorough, practical* education.

Testimonials.

We have learned by observation that a Catalogue of testimonials is of no value. An Educational, as well as any other Institution, must show by its *work* what it is accomplishing, and not through other mediums. In order, however, to give the testimony of our Students and citizens we present the following, to which we invite special attention :

We, the Students in attendance at the Northern-Indiana Normal School, in order to express more fully our approval of the workings, rapid progress, and beneficial results of this Institution, desire to present the following statements :

- I. THAT THE SCHOOL IS AS REPRESENTED.
- II. That we recognize in it a success as a self-governing Institution.
- III. That it is as much the home of the poor boy and girl as of the son and daughter of the rich magnate.
- IV. That work and not wealth is, indeed, the standard ; and each student, by his diligent application, tries to elevate this standard to the highest point of excellence.
- V. That although the cost of provisions is constantly varying, yet the price of the board has been kept within the limits of the advertised rates, speaking well for the institution and its managers.
- VI. That we, as Students, knowing the high moral worth and the many advantages possessed by the Institution, would advise any young man or woman desiring to acquire a thorough and practical education, in less time and at less expense than AT ANY OTHER SCHOOL IN THE COUNTRY, to visit the Normal.
- VII. That to Prof. BROWN, and his faithful assistants, we owe a debt of gratitude which time cannot obliterate, and which will ever remain inscribed in indelible characters on the ledger pages of our memory.

To the Teachers and Students of the Northern Indiana Normal School and Business Institute :

We, the undersigned, in behalf of the citizens of the city of Valparaiso, feeling that we owe a testimonial of respect and kind regard to the Teachers and Students of the NORTHERN-INDIANA NORMAL SCHOOL AND BUSINESS INSTITUTE, desire, as a partial expression of our good will, to say that we feel highly honored in having in our midst so large a number of young people who have in every way deported themselves as becomes true ladies and gentlemen.

While at many Institutions of learning there seems to be a spirit of discord and rivalry between the citizens and students, we can truthfully say that from the beginning of this School, we, as citizens, have had no cause for any but the kindest of feeling. We cheerfully and gladly welcome you to our city, our homes, and our churches ; our doors will ever be open, and we shall endeavor to do all in our power to make your stay with us as pleasant as possible. We trust that as you shall complete your studies and go to new fields of usefulness, you may ever sustain the high standard of moral deportment that has characterized you here, and as you shall leave, we hope that others equally worthy of our regard and esteem may come to take your places.

STATISTICS.

The School was organized Sept. 16, 1873, with 35 in attendance. This number increased to 61 during the First term. Enrollment Second term, 90; Third term, 172; First term second year, 299; Second term, 325; Third term, 521; Fourth term, 691; First term third year, 825; Second term, 931; Third term, 1,041; Fourth term, 1,320. In the thinking mind this remarkable growth is sufficient evidence that the work accomplished at this School meets the wants of the times.

EXPENSES
ARE LESS HERE THAN AT ANY OTHER
SIMILAR INSTITUTION IN THE
LAND. SEE PAGE 10.

LOCATION.

Valparaiso, containing about 4,000 inhabitants, is easily reached from all points, being at the junction of the Pittsburgh, Ft. Wayne & Chicago, and Chicago & Lake Huron Railroads, forty-four miles east of Chicago, and nine miles west of Waukegan, at the crossing of the Louisville, New Albany & Chicago Railroad. It is distant twenty miles from Hebron, on the Cincinnati & Chicago Air Line Railroad, nine miles from Westville, and but eight miles from the Baltimore & Pittsburgh & Chicago Railroad. It is situated in as beautiful and fertile tract of country as can be found in the West, and its healthfulness is unsurpassed. These facts, together with the intelligence and Christian character of its inhabitants, make it one of the most desirable places for a Literary Institution anywhere to be found.

The School Building is a large and commodious one, situated on an eminence overlooking the city and surrounding country. The Campus containing five acres, is beautifully ornamented with a natural grove affording a grateful shade in summer, and shelter from the storm in winter. For further information address,
