**A FURTHER NOTE ON *GLENOSTICTA PICTIFRONS*  
(HYMENOPTERA: SPHECIDAE) IN MICHIGAN**

Mark F. O'Brien<sup>1</sup>

In a previous paper (O'Brien 1989) I listed a single record of *Glenosticta pictifrons* (Smith) from Michigan. The female specimen was from the E.S. George Reserve in Livingston Co., and I stated that it was the only record from the George Reserve. Recently, more specimens of this wasp have turned up in the UMMZ collection, considerably expanding the range of dates and localities, thus establishing *G. pictifrons* as a resident, but quite uncommon species. The additional Michigan records are as follows:

BERRIEN CO., Cook Power Plant, 26-VII-1976, *Rudbeckia hirta*. (1 male) F.C. Evans. LIVINGSTON CO., E. S. George Reserve (except as noted, specimens were collected by F. C. Evans): 18-VII-1957 (male) U.N. Lanham, coll.; 6-VII-1974 (male & female in copula), on flowers of *Rudbeckia hirta*; 20-VII-1972 (male), *R. hirta*; 12-VII-1974 (male), *R. hirta*; 9-VI-1977 (2 males) *Hieracium florentinum*; 11-VII-1989 (male) *R. hirta* flowers.

**ACKNOWLEDGMENT**

I thank Francis C. Evans, Univ. of Michigan, for alerting me to the other specimens of *G. pictifrons*.
